ABOUT ME

I am an ambitious, trustworthy and reliable job seeker in the IT industry where I can challenge my skills and develop further. I have over 6 months of non-commercial experience in using front-end technologies and creating websites using HTML, CSS, JavaScript and React. In addition, I used to run an online store and was a deputy manager. Currently, I have created a Netflix application, blog and store. I am known for my flexibility, reliability and loyalty. I can adapt to every situation and challenge I am struggling with. I enclose a link to my portfolio.
